## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 13, 17 and 24 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's Admitted Prior Art (AAPA).

Applicant, at page 1 of the specification to be known as AAPA, discloses a folding apparatus with folding rolls, wherein the folding rolls comprise frictional areas to which a ceramic layer of frictional material has been applied by thermal spray coating and areas on the cylindrical surface with no friction coatings.

3. Claims 1 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Weatherhead et al. (US Patent 4,917,283) or Tebbe et al. (US Patent 5,048,809).

Weatherhead et al. discloses a folding apparatus with folding rolls wherein the folding rolls comprise a cylindrical surface having frictional areas 20 bonded by non-frictional areas 30. See also figure 17 of Tebbe et al. which discloses frictional areas 94, 96 bonded by non-frictional areas 92. Applicant should note that the recitation of a layer of frictional material being applied by thermal spray coating amounts to a product-by-process limitation. "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The

Art Unit: 3726

patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.” *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985), see MPEP § 2113.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-5, 11, 12, 14-16, 18-23 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA.

AAPA discloses a folding apparatus and a folding roll as shown above. Although AAPA does not give specific details as to whether the surface is rhombus-shaped, spirally arranged, having a plurality of cylindrical surfaces or the particular depth of the friction material, however, Official notice is taken in that it was well known to a person of ordinary skill in the art at the time of the invention, to have provided rhombus-shaped, spirally and a plurality of cylindrically arranged surfaces because such features are well known in the roller art to provide a desired gripping or embossing surface. The particular depth of the friction material is an obvious matter of design choice to a person of ordinary skill in the art, depending upon the desired gripping or embossing surface

desired. In addition, Official notice is taken that the claimed depth of the friction material is well known in the art of roller surfacing.

### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1-5 and 11-25 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
